

# 1001 Safety Guidance EXTENSION CABLES

# **Using the Equipment**

- 1. If you think a cable may be cut or damaged in any way, switch off and unplug at the mains before inspecting it. If the cable attached to the machine is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
- Take care not to accidentally pull the plug from the socket.
- Switch off and unplug before leaving the machine unattended.
- If your equipment does not work properly, do not attempt to repair it. Contact the hire company.

Please keep this leaflet safely as it may be required for future reference

## Cable Reels and Distribution Boxes

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

### It is important to read this entire leaflet BEFORE using the Cable Reels and Distribution Boxes

- 1. Plan your work and think ahead to make sure you will always be working safely.
- Electricity is hazardous and must always be used with great care.
- Cable reels and distribution boxes are designed to supply the electricity safely up to their rated current.
- If you have not used this type of equipment before, familiarise yourself with the cables, plugs and sockets before connection to the electricity supply.
- You must have at least the following items of personal protective equipment: RCD if using a 230 volt (mains) supply.
- Particular items of equipment or environments may require a higher level of personal protective equipment.
- Electrical equipment must not be used by minors, or by anyone under the influence of drugs or alcohol.
- Electrical equipment is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using it.
