## Using the Centrifugal Pump

- Wear your protective equipment if you are working on or near the pump.
- 1. Set the pump in position and connect the suction hose and strainer, ensuring the 2. strainer is not blocked and is completely submerged. If there is an air leak in the suction hose, the pump will not work efficiently. Do not use this pump without the strainer properly attached.

- After starting the engine, the pump will start pumping the water immediately. 5. If the pump operates but fails to pump water effectively, it is probably because
- there is an air leak in the suction hose or connection, or the strainer is not fully

Stop the engine before re-siting the unit; moving the hoses; or cleaning the

Keep a check on the discharge area to make sure that no hazard is being created.

Do not pollute rivers or drains - if in doubt check with the hire company or local Environment Agency - you can find their number in the telephone directory.

Do not allow vehicles to run over the hoses at any time, unless you are using
